RECORD HERALD

A Record of a Busy Present — *A Herald of a Busier Future*

IN THE SERVICE OF TOLEDO

Vol. II. December 15, 1915 No. 4

NEWTON'S LAW IN BUSINESS.

That Newton's law of action and reaction is applicable to business as well as to mechanics, and that observance of this law by business firms means money in the form of increased profits and diminished losses, was the gist of a lecture given to the students of Commerce and Business by Frank H. Storms, representing the Babson Statistical Organization, Tuesday evening, December 7.

From an enlarged chart showing successive rise and fall in business conditions, he pointed out the regularity of the fluctuation along broad lines, and the fact that the area of each depression and rise, as computed by its degree of severity and its length of duration, was about the same in each case. In other words, a depression is always followed by a corresponding rise, and vice-versa. If the departure from the average, either above or below, is very great, it will not last very long. If, on the other hand, it is only slight, it will probably be long drawn out. Knowing this, the business man can look ahead with some certainty of the future, and make his plans accordingly.

Mr. Storm pointed out that the chart now shows prosperity and it was likely to continue at least until the close of the war.

Discusses "Peace Trip."

"There is a great possibility that Henry Ford will do much towards making peace between the warring nations," said Prof. W. M. Leiserson when questioned regarding the invitation he had received to accompany Ford on his peace ship.

"If I thought that, individually, I could assist and help the cause I would gladly have accompanied the ship. But owing to my many duties in Toledo at the present time, it was impossible for me to accept the invitation," declared Professor Leiserson. "Nothing wonderful has ever been accomplished but what the majority of people laughed at the foolishness of the idea, he continued. It takes some one just as rash and disregardless as Henry Ford to accomplish the wonderful feat of quieting the belligerent nations."

TEAM TO HAVE SUITS.

Suits for the men's basketball team have been ordered. Money for this purpose has been subscribed by the faculty, board of directors, and alumni of the University. Also, dues of fifty cents per year are to be collected from members of the Athletic Association. This action was authorized at a meeting of the Athletic Board, Monday, December 6, where a campaign for more members was planned.

Manager Christenson is working on a schedule, but as yet only one game, with Defiance, January 8, has been definitely contracted for. He expects to close arrangements very soon for games with Akron, University of Detroit, and the Western State Normal, of Kalamazoo.

Students Form Lit. Society.

A University Literary Society was organized at a meeting held Friday evening, December 10.

Dean Troxell took the chair until the election of Edwin Tippett as President. The other officers elected were: Miss Aurelia Quinn, vice-president; Miss Ernestine Gillespie, secretary, and Ivan Bolton, treasurer. A constitution committee was appointed, which is to report at the next meeting, to be held next Friday evening, December 17. It was decided that while it would be wise to limit the membership later, the number of charter members will not be limited, and that any student of the University will be welcomed to the society. The charter will be held open until after the next meeting.

Professor Leiserson, who was present, announced that he has been pushing a movement for the organization of a debating club. It is expected that a club of this kind will be formed soon. But he approved the formation of the new literary society, since he thinks there ought to be at least two societies of that type in the school. Professor Leiserson hopes by next year to arrange a series of debates with other colleges.

Following their meeting, Saturday evening, December 4, Tuds made a pilgrimage to the Temple to see the photo-play of "Barbara Frietchie."

SUPPORT SUNDAY LECTURES.

Has it ever occurred to you that the series of Sunday lectures being given by members of the University faculty are worth the time you would have to take to attend them,—and then some? The comparatively small space to which The Record-Herald has been limited in accounts of these lectures does not indicate our estimate of their value.

The men who are giving them are in demand as lecturers in this city and elsewhere, and the demand is growing. They have something to tell you, and they know how to tell it. Their subjects vary over a wide range, so each one should be of interest to a large number of T. U. students. Music has been added to the program in each case, to make the hour as pleasant as possible. In short, everything has been done to make those Sunday afternoon programs as profitable and enjoyable as they can be made.

They deserve more recognition in the way of larger attendance by Toledo University students.

What's in a name? And yet Henry B. Joy, president of the Packard Motor Co., is a cousin of Dean A. R. Cullimore of Toledo University. Mr. Joy must be one of those fortunate individuals who have greatness thrust upon them at birth.

Since the University office force is too small to handle the mailing of the Record-Herald in addition to their regular work, the various societies of the school are being asked to take charge of the work. The last issue was mailed out by the girls of the Pi Delta Chi society. The present issue is being taken care of by the G. A. S. The Record-Herald wishes to express its appreciation of the work done by these societies.

Prof. R. J. Colbert addressed the Working Girls' Clubs of the city, Tuesday evening, Dec, 14, at Trinity Church, on the subject, "Minimum Wage for Women."

OFFICE ANNOUNCEMENTS

Exam. Policy Outlined.

At a meeting of the Faculty of the College of Arts and Sciences, December 7, it was recommended that the following paragraph be included in the next and subsequent issues of the catalog for that college:

While no specified time for examinations is set in the calendar of the University, the work of the students is thoroughly tested by oral and written tests or examinations. It is left to the individual departments of the College to determine the types of tests or examination, and the methods of administering these exercises which will be of greatest educational value to their students.

Changes in College Fees.

Important changes in the fees to be charged in the various colleges of the University were made at the last meeting of the Board of Directors, November 29. Instead of a different schedule for each college, the system obtaining at present, four of the colleges will have a uniform system of fees. They are the College of Arts and Sciences, Commerce and Business, Industrial Engineering and Industrial Science, and the Graduate College. Fees for those colleges will, beginning next semester, be as follows:

Semester University registration fee	$2.00
Semester Laboratory fee	3.00
Semester Gymnasium fee dependent upon fee charged University by Y. M. C. A. and Y. W. C. A., not yet determined.	
Semester Shop fee	5.50
Diploma fee	5.00

The incidental fee of $8.00, heretofore charged, has been abolished, as has also the per hour tuition of the College of Commerce and Business. But the gymnasium and laboratory fees formerly included in the incidental fee have been added.

LIBRARY NEWS.

A hundred dollars' worth of new books have been ordered for the Chemistry department.

History and English books from the University library have been removed to the reference room of the Public Library, where they have been assigned to a special shelf, along with the Sociology and Economics books from this school, which had already been removed.

Magazines of last year are to be bound.

PUBLIC SERVICE BUREAU

WORK ON FRANCHISE.

The Municipal Research and Reference Division of the Public Service Bureau of Toledo University is at present drawing up a franchise for the Rail-Light. Prof. W. M. Leiserson, who heads this division, said that Mayor-elect Milroy has expressed the intention of calling on the Bureau from time to time for needed information on municipal subjects. This division is also gathering facts in regard to valuation of city property and expects to assist the new mayor in reorganizing departments under the new charter.

Other divisions of the Public Service Bureau are the Social Service, under Prof. R. J. Colbert; the Psychological Clinic, under Prof. A. W. Trettien; Efficiency in Education, under Prof. Josephine Leach; Engineering Service, under Dean A. R. Cullimore, and Industrial Chemistry, under Dr. Kreider.

Devise System of Records.

The Social Service Division is preparing a system of records for the Juvenile Court.

The Public Service Bureau will occupy the room at the end of the lower hall, when work on it has been completed. The Public Library has donated three bookcases for this room, which will contain the offices of Prof. W. M. Leiserson, Prof. A. W. Trettien, and Mr. R. J. Colbert.

HENRY AND KREIDER LECTURE.

Prof. D. W. Henry gave a lecture on "Education" on Sunday afternoon, December 12. He gave the history of education, touching only the "high spots," as he expressed it. Miss Lily Froehlich, a former G. A. S. girl, played a selection on the piano. Mr. Ralph Hakins sang a solo, accompanied by Miss Froehlich.

"The extraordinary things of nature are not accidental. In reality they are the result of providential foresight," declared Dr. H. R. Kreider at the Sunday afternoon gathering of students in the University building, December 5. "Apparent Accidental in Nature," was his subject.

Music was supplied by Ralph Girkins, who sang several solos.

Mallory Next Speaker.

Prof. Benjamin E. Mallory will deliver the next Sunday afternoon lecture, December 19, speaking on "Political Science." Vocal selections by Marie Kerlin, accompanied by her sister, Agnes Kerlin, will complete the program. Lecture begins at 3:15.

WHAT THE CLASSES ARE DOING.

The Editor and Publisher and Journalist, a national weekly for newspaper men, has asked the department of Journalism to contribute to its page of "News from the Schools of Journalism." The name of Toledo University will appear alongside of Depauw, Michigan, Illinois, Wisconsin, and the other big schools of the country.

* * *

Dean Cullimore says the night class in Structural Designing is unique among T. U. classes in that it is composed entirely of college graduates,—sixteen of them. Purdue, Harvard, Northwestern, Case, Michigan and Ohio State are among the institutions represented there.

* * *

Students of Journalism 109 have begun their laboratory work on the Toledo Times. They will do reporting for that paper under the special supervision of Mr. Raymond T. Skinner, Managing Editor, together with that of Dean E. E. Troxell, of the College of Commerce and Business.

* * *

According to Prof. S. M. Pimienta, several Toledo firms, among them being the DeVilbiss Manufacturing Co., Toledo Ice Box Co. and the Toledo Computing Scale Co., are now employing students of Spanish from Toledo University for their South American correspondence.

* * *

The students of the Business Organization class have organized, theoretically, a paper box factory. The object of this organization, according to Professor Mallary, who is supervising the work, is to acquaint the students with the intricate problems that confront the executive department of any large organization. Arthur Seltzer was appointed executive manager. The factory has been divided into the usual departments, with a student at the head of each.

Inability to get structural steel, owing to the rush of war orders, has held up work on the new addition to the University building. President Stowe says the work may be delayed indefinitely as it is very uncertain when the necessary material can be secured.

Christmas recess begins Thursday, December 23. There will be no classes from that date until a week from the following Monday. The University will reopen January 3, 1916.

EXTENSION LECTURES.

Prof. A. W. Trettien talked to the police, Friday afternoon, December 10, on "Psychological Phases of Crime and Criminals." This was one of the series of lectures being given by the University in co-operation with the police department.

The second lecture of the University Extension series being given at the Y. W. C. A. was given by Prof. R. J. Colbert. Dec. 7. His subject was "Leadership."

The next of the series is to be a talk by Prof. A. W. Trettien, January 4, on "The Adolescent Girl, Her Physical and Mental Hygiene."

Troxell Talks to Ad Club.

Dean E. E. Troxell of the College of Commerce and Business addressed the Toledo Ad. Club Tuesday noon, November 31, at the Commerce Club, on the subject of "Copy."

He argued that more effort should be directed toward making ads interesting. The human interest appeal, heretofore largely neglected, has great possibilities. he said. in increasing the effectiveness of an ad.

Charter Car for Detroit Trip.

Mr. Colbert's classes in Sociology, and Professor Leiserson's Economics students, are to go to Detroit, Thursday, December 16, for a tour thru the Parke-Davis and the Ford plants. A special car has been chartered for the trip, and it is expected that it will be well filled. About fifty students have already promised to go.

Oh, For Youth Again!

A "Back to Childhood" party was held in the University on the evening of December 11, under the auspices of the Pi Delta Chi society. All the girls who dressed dolls for the Santa Claus Club were invited. They wore short dresses and their hair down their backs, tied with big ribbon bows. Each carried the doll she had dressed. Miss Leach and representatives of the Santa Claus Club were present. Childhood games were played and Miss Leach told a children's story. Fifty dolls in all were dressed by the University girls.

The G. A. S. met at the home of Anna Scherff, 631 South Erie street, on November 26, to dress the dolls for the Santa Claus Club. Four dolls were dressed. This being the holiday meeting, some of the out-of-town girls were present, among whom were Mrs. J. H. Rowen, of Ann Arbor, and Miss Annie Miller, of Florida, O.

TAKE CHARGE OF GIRLS' ROOM.

The girls of the University have organized a club for the purpose of equipping and taking charge of the Girls' Room. At a meeting held Friday afternoon, December 10, the following officers were elected: President, Helen Beecher; vice-president, Dorothy Kellogg; secretary, Ruth Greiner; treasurer, Alice McTigue. Ann Scherff was appointed chairman of the Room Committee. A new committee will be appointed each month to take charge of the room for the following month.

The future meetings will be held in the club room, which will be completed by December 18.

Girls to Play Soon.

"Girls' basketball pratice is coming along fine" so Quinn, the captain, says. Professor Henry as regular coach, with Kramer and Keller assisting, are hard at work.

Anna David has been elected manager and the most promising candidates for first team are: Laura Grossman, l. g.; Aurelia Quinn, r. g.; Mildred Cowell, c.; Oliena Benster, Jessie Bersticker, Anna David.

The girls expect to play another team at an early date.

Prof. Defends Politics.

"Every person in the United States should be a politician," said Prof. W. M. Leiserson, in a short talk to the alumni at their luncheon held Saturday evening in the Commerce Club rooms. In a democracy such as this, he said, it is important that every citizen take an active interest in the problems of government, and remove the odium now attaching to the term "politician." A talk by President Stowe completed the program, which was followed by a business session. A sum of five dollars was voted for the purchase of suits for the men's basketball team. The next meeting. which would have fallen on New Year's, was postponed until January 6.

University students are assisting the Santa Claus Club by visiting homes in the city and learning what the families need. This is usually learned thru the schools, but 200 families have moved during the year, and a number of University students, particularly sociology students, are helping to gather the needed information.

Next year the University will receive copies of all the magazines regularly. They have already been subscribed for.

RECORD HERALD

A Record of a Busy Present — *A Herald of a Busier Future*

In the Service of Toledo

Vol II — December 3, 1915 — No. 3

UNIVERSITY AND PUBLIC LIBRARY CO-OPERATE

The library of the University, consisting of 689 books, is soon to be moved to the reference room of the Public Library. The reference room will be used as a study room by the University students. Books, belonging to the public library and to the university, used as references by the students, will be placed on the shelves at the request of the Professors in charge of the subject.

By this co-operation between the two buildings the students will be given a much larger scope of reference and the general public will have access to the University books, some of which would otherwise never be used.

Dr. R. C. Kissling, professor of German and Dean A. Cullimore, professor of Civil Engineering, will leave the books on their subject, together with the dictionaries and encyclopedias, in the University Library.

———o—o———

INDUSTRIAL DEPARTMENT HAS NEW INSTRUCTORS

Two more instructors have been added to the Night Industrial force, Mr. Harold Schultz and Mr. Howard Cummins. This makes eight teachers in all. There are about ninety new students enrolled in the Night Industrial School. This brings the total to about 160.

———o—o———

MACHINE SHOP IS A SUCCESS

The success of the machine shop is extraordinary. The equipment consists of 4 machines, and 36 students are enrolled. "The secret of this success," says Prof. Starr, "lies in the enthusiastic work of instructors and the real factory system of conducting shop courses. We teach our men to make drawings, and then use them in the shop. They build lathes, all necessary tools, and therefore see that two things will never run together, unless they are absolutely right. We develop responsibility in our men, and the spoiled work is practically unknown. The use of time cards this year greatly improved the efficiency of our students, affording means for comparison of different men.

"The results are above all expectations: Eight of our last year students advanced from 18 to 25 cents per hour, laborers to the position of 32-45 cents per hour mechanics."

———o—o———

DR. WHITEFORD INTERPRETS "THE TEMPEST"

Dr. R. N. Whiteford, of the English department, was the speaker at the second lecture of the Sunday afternoon series, Nov. 14. He gave a clever interpretation of Shakespeare's "The Tempest."

HEALTH BOARD TO OCCUPY SCIENCE BUILDING

Council has authorized the expenditure of $500 for improvements at the Science building. It is to be occupied by the city's department of health at the beginning of the year.

The main floor and basement are to be converted into offices for the board of health, the inspectors and Dr. Iford. The auditorium of the building is to be altered into a laboratory. Quarters will be provided for the visiting nurses.

———o—o———

IMPROVEMENTS BEING RUSHED

Work is progressing rapidly on the new addition to the University. The basement of the annex will be ready for occupancy by the Machine Shop about the first of January. The class rooms and auditorium in the annex will be ready for the students when they return next semester.

The girls' cloakroom, on the east side of the building, is now completed. The men will have the exclusive use of the cloakroom off of the library. The quarters for the Public Service Bureau, on the east side of the lower hall, are rapidly nearing completion.

———o—o———

PROF. LEISERSON REPRESENTS CITY

Prof. W. M. Leiserson attended the convention of the National Municipal League in Dayton last week.

Prof. W. M. Leiserson represented Toledo at the conference on valuation under the auspices of the Utilities Bureau meeting in Philadelphia on November 10, 11 and 12. He was delegated by Mayor Keller.

CO-EDS ARE IN LAW SCHOOL

Three are girls of the class of forty-three enrolled in the law course this semester. They are Miss Esther Antin, Miss Margaret Speilman and Miss Eva Eppstein. The latter won a scholarship to the law school. Miss Antin is now practicing law.

——o—o——

LOYALTY

We have a real varsity basketball team. It is our duty to support it!

We cannot all be active participants in the college games. But we can, and it is just as praiseworthy, be active followers of the games.

It is indeed encouraging to the students who are endeavoring to make the basketball team to note that their efforts are being appreciated.

The keen interest in their work is not limited to a few students, who are always ready to bear the brunt of any activity started at the University, but is to be found in a large number of the students—male and female.

This true-blue-loyal-to-the-end spirit deserves to flourish. The spirit of enthusiasm is growing!

We know that all the students have it—but it is dormant in a few.

Cultivate it!

Be active! Don't be a dead one!

Fall in line! Pledge your support to the team! We will count on your support in whatever may be undertaken to add impetus to the interest in the athletic work started at Your Municipal University.

L-O-Y-A-L-T-Y of the student-body spells success for athletics at the University!

——o—o——

ENGINEERS PREPARE MAP

The survey of the University Farm made by the civil engineering students has been completed and the remainder of the term will be spent making maps of the form from the data secured. Each student will make his own map, from the preparing of a frame covered with cloth-backed paper, to the finished map with the outline of the farm, and all its topographical features.

Dean A. R. Cullimore represented the Society for the Promotion of Engineering Education at the meeting of the Urban Universities, held at Cincinnati, Nov. 14 to 17.

——o—o——

OFFICIAL ANNOUNCEMENTS

College of Arts and Sciences Classification of Students

Students in the College of Arts and Sciences who desire to be classified as regular students in that college should obtain a blank form from the general office, fill out and return same to the general office on or before December 1st. It is important that all students who have fulfilled the entrance requirements make application for classification as regular students since unless such action is taken those students will be classified as special students. Special students who desire to have work credited toward the title of Apprentice in Arts or the degree of Bachelor of Arts must do work of at least a grade of B in order to have the work so credited. Regular students are required to do work of at least a grade of C.

Regulations of the College of Arts and Sciences concerning regular and special students.

1. Students may be admitted as regular students either by certification or by examination. Students admitted as regular students by certification must submit certificates of graduation from a first grade high school of Ohio or from a secondary school rated by the educational authorities of the State as doing the work of a first grade high school as high schools are graded by the State Educational Authorities in Ohio. Certificates of such high school graduates should be sent or left with the University secretary, University Building, as early as possible. These certificates should indicate clearly the work and character of work which the student has done in high school. As soon as a copy has been made of the contents of the certificate it will be returned to the student.

2. Students who desire to be admitted by examination should write the University Secretary for a statement of rules and regulations concerning such examinations. Examinations will be regularly offered in June and in September as scheduled on the University calendar.

3. Students over twenty-one years of age who have not had a full high school course may be admitted as special students and as such allowed to do the work in the courses for which they have had satisfactory preparation. Special students who have done satisfactory work in the College courses may become

regular students by presenting evidence that they have satisfactorily completed fifteen units of high school work or its equivalent. In such cases all work of a grade of A or B completed while the student was a special student, may be credited toward meeting the requirements of the title of Apprentice in Arts or the degree of Bachelor of Arts.

Changes in Requirements for the title of Apprentice in Arts:

At its last meeting the Administrative Board of the College of Arts and Sciences passed the following regulations making changes in the requirements for the title of Apprentice in Arts:

1. Students enrolled in the Toledo Teacher Training Course may substitute Education 101 for Education B.

2. Literature BL—Children's Literature and Story Telling may be substituted for Literature B toward meeting the requirements for the title of Apprentice in Arts.

Schedule of Required Freshman courses in the Junior College.

The Administrative Board of the College of Arts and Sciences at its last meeting approved the following tentative schedule of required Freshman courses for the second semester.

Education B—University Education, Professor Stowe, Tuesday, Thursday, 9:10 A. M.

Education 101—Modern Educational Problems, Professor Henry, Tuesday, Thursday, 9:10 A. M.

Education 111—Principles and Observation of Teaching, Professor Leach, M. W. F. 8:10 A. M. Require only of students in the Toledo Teacher Training Course.

English B—College Rhetoric, Miss Kinney, Section I, M. W. F. 11:10 A. M. Section II (Grammar) M. W. F. 10:10 A. M.

History B—Modern American History, Professor Henry, Section 1 M. W. F. 10:10 A. M. Section II M. W. F. 11:10 A. M.

Literature B—Modern American and English Literature, Professor Whiteford, Tuesday, Thursday, 11:10 A. M.

Literature BL—Children's Literature and Story Telling, Miss Kinney, Tuesday, Thursday, 11:10 A. M.

Political Science A—Modern Problems of State and City Governments, Professor Leiserson. Section I, M. W. F., 9:10 A. M., Mr. Mallary. Section II, M. W. F., 2:10 P. M.

Sociology B—Modern Social Problems, Professor Nearing, Section I, Tuesday, Thursday, 10:10 A. M. Section II, Tuesday, Thursday, 11:10 A. M.

Physical Tr. B—Tuesdays, 2:10-4 P. M.

Required Courses in Toledo Teacher Training Course Offered Second Semester.

EXTENSION WORK CONTINUES

In addition to the series of lectures being given to the city police, the Toledo University Extension work includes a series of lectures to be given under the auspices of the Young Women's Christian Association. The first lecture was on The Adolescent Girl and Her Training. by Prof. Trettien, Nov. 9. The next will be given by Prof. R. J. Colbert, Dec. 7, 1915, at 4 p. m. His subject will be "Leadership."

The committee in charge of formulation of the courses required in the Toledo Teacher Training Course approved the following of the above described courses:

Education 101—Education 111 t. o. English B, 2nd Section.

History B—Literature BL—Political Science A, Second Section.

Sociology B and Physical Training B.

———o—o———

Dr. R. Pintner and Dr. E. W. Burgess, professors of Ohio State University, were the week end guests of Professor and Mrs. O. W. Irvin. Both were formerly professors at Toledo University.

———o—o———

TO HAVE ATHLETIC FIELD

The university is to have an athletic field. next spring, according to President Stowe. The field will be located on that part of the University farm between the Lake Shore R. R. and the boulevard, extending back from Nebraska Ave. about 800 feet. The plot is estimated by Prof. Cullimore to contain about ten acres, ample space for a baseball field and a number of tennis courts.

Bleachers are to be erected, with dressing rooms beneath, for the use of the teams. The field will probably be ready for use at the opening of the next baseball season.

The ground has heretofore been rented out for farming purposes, but it will now be reserved for athletics.

———o—o———

G. A. S. INITIATION

The G. A. S. held the initiation of the new-members Tuesday, November 9, at the home of Miss Monica Kraus.

Following the initiation, dainty refreshments were served and each of the new members was presented with a yellow chrysanthemum, symbolizing the society colors, yellow and gold.

Saturday, November 13, the new members were entertained at a luncheon at the Boody House. Covers were laid for twenty-seven at a table beautifully decorated with dwarf chrysanthemums and green ferns spelling out G. A. S

———o—o———

According to Dr. Whiteford and Miss Kathryn Wilcox, the beginning of man's downfall is when he begins teaching school.

—o—o—

PI DELTI CHI ENTERTAINED FOR NEW MEMBERS

The new members of the Phi Delta Chi Society were entertained Saturday evening at the University building. The color scheme of green and white, the colors of the society, was carried out with white chrysanthemums and evergreens and each new member was presented with a white chrysanthemum.

Games and dancing were the principal features of the evening. The newly initiated girls present were the Misses Josephine Leach, Gladys Doane, Jean Lucas, Anna Chambers, Myra Kidney, Pauline Bishop, Jessie Bersticker, Margaret Duer, Genevieve Howell, Dorothy Bitter and Dorothy Kellog. Other members present were the Misses Esther Severinghaus, Aurelia Quinn, Ellen Quinn, Margaret Gould, Georgia Howell, Annis Canfield, Laura Grossman, Nellie Hopkins and Mr. and Mrs. E. E. Troxell, Dr. and Mrs. A. M. Stowe, Messrs. Brandeberry, McGuffey, Cornell, Gerkins, Bemis, Graves, Paquette, Harpst, Tetes, Frey, Keller, Christenson, Corbett, Kramer, Schnedder, Christman, Bertsch, and Professors Henry and Mallary.

—o—o—

"TUDS" ENTERTAINED

Miss Marie Lemberger entertained "Tuds" Friday evening at her home at 6 Norwood Court. Games and music were the principal features of the evening. Dainty refreshments were served to the following: Laura Grossman, Aurelia Quinn, Annis Canfield, Ernestine Gillespie, Josephine Aubry, Eva Samsen, Magdelene Frey, Elizabeth Aufderheide, Ann Scherff and Professors D. W. Henry, B. E. Mallary, R. N. Whiteford and Messrs. Russell McGuffey, Ralph Paquette, Willis Curtis, Emil Frey, Wendell Johnson and Walter Schneider.

Although the motion picture entertainment given at the first meeting of "Tuds" had proved popular with those who were present, for the sake of variety, a bit of spoken drama was the chief feature of the last meeting, held Saturday evening. Ernestine Gillespie and Willis Curtis gave a clever piece of dialogue, entitled "A Happy Pair." Music for the program was furnished by Anne Scherff.

PROF. A. W. TRETTIEN WRITES FOR QUARTERLY JOURNAL ON PSYCHOLOGY

Prof. A. W. Trettien is the author of an article in a Quarterly Journal on Psychology for the Pedagogical Seminary at Worchester Massachusetts. The title of the article is "Differentiations of the Field of Normal Schools, Colleges and Universities in the Training of Teachers."

The first and third honors of the State examination in Pharmacy were won by Sister St. Simone and Sister Laford. They are graduates of Toledo University, Department of Pharmacy, Class '15. The averages were 94.5% and 87.5%.

—o—o—

DO YOU WISH TO CHANGE?

Students desiring to change their courses must secure permission of the Dean of the college in which they are enrolled.

Students who drop a course without the permission of the Dean will be graded the same as if they failed.

Students enrolled in the college of Arts and Sciences and who desire to drop a course should notify Dr. Stowe.

—o—o—

Miss Agnes Kerlin and Mr. Dick Fisher sprained their ankles in an attempt to jump over a horse. A collection was taken up in the gym. for flowers and the horse was banished to a corner.

—o—o—

ATHLETIC COMMITTEE APPOINTED

A committee of five people was appointed at a mass meeting of the students on November 2, for promoting the athletics of Toledo University. J. Cornell was chosen as chairman. Other members are Aurelia Quinn, A. J. Graves, Betty Hobart and R. J. Colbert.

The membership of this association is to include officials of the University, its faculty, its active student body, and its alumni.

The officers elected are: President, William Tucker; junior vice president, Laura Grossman; secretary, Esther Severinghaus, and treasurer, Prof. D. W. Henry. The officers shall consist of a member of the faculty, a member of the board of trustees of the University, a member of the Alumni Association, the athletic director, and the captain of the various teams.

Arthur Graves was elected captain of the boys' team; Wilfred Christenson, student manager; Prof. D. W. Henry, faculty manager.

Aurelia Quinn, captain of the girls' team; Anna David, student manager; Prof. D. W. Henry, faculty manager and coach.

—o—o—

SUNDAY LECTURES

Prof. Oscar Irvin's visit to Mammoth Cave, mentioned in a previous issue of the Record-Herald, gave him material for an illustrated lecture, which he gave at the University Sunday evening, Nov. 21. The program also included vocal selections by Mr. and Mrs. Bert Moore.

INDUSTRIAL COLLEGE OPENS NOV. 1

Practical instruction will be offered in mechanical and structural drafting, electrical theory and machine designing, in the special classes of the Industrial college, which opens Nov. 1.

The work is confined to evening classes which will be held as follows: Advanced Mechanics, Prof. Havlicek, Monday, Room 12-13; Shop Drawing, Prof. Starr, Tuesday and Thursday, Room 12-13; Mechanical Drawing, Prof. Havlicek, Wednesday, Room 12-13 Structural Drawing, Prof. Tuttle, Friday, Room 12-13.

The following classes will be held in Room 8: Shop Mathematics, Prof. Brandeberry, Monday; Mathematics-A, Prof. Cullimore, Tuesday; Machine Designing, Prof. Starr, Wednesday; Mechanics, Prof. Irvin, Thursday; Electrics, Prof. Irvin, Friday.

These classes will be held in Room 16: Mathematics-B, Prof. Brandeberry, Tuesday; Mathematics-A, Prof. Cullimore, Thursday.

The following classes will be held in Room 17; Mathematics-C, Prof. Irvin, Tuesday; Mathematics-B, Prof. Brandeberry, Friday. The hours will be from 7 to 9.

CHANGES TO BE MADE IN THE UNIVERSITY BUILDING

The Board of Directors at a meeting Wednesday evening at the University building, authorized President A. M. Stowe to make all necessary changes in cloak rooms on the west side of the building, to fix up an office off of Room 4, to be occupied by the Dean of Industrial Sciences, one off of Room 11, for the commercial and English departments, and one off of Room 16, for Dean Nearing.

Dr. Stowe was also authorized to convert the east side of the lower hall into an office for the Public Service Bureau, and the upper east hall into the girls' cloak room, rest room and toilet. The work has already been begun.

REGISTRATION FIGURES

Present figures on registration give 329 students in college of Arts, 97 in Commerce and Business, 65 in Industrial Science, 40 in Law, 6 in Pharmacy and 13 in the Graduate College.

"ENGINEERS GIVE FUN FESTIVAL"

A "Chamber of Horrors," with witches, goblins, skeletons, and other ghostly figures, was one of the first things that met the guests of the Engineers, at their Hallowe'en Party, Saturday evening, October 31. Advertised for a week previous through pictures displayed on the blackboards of all the class rooms in the main building, as a "Fun Festival," interest was raised to a pitch that brought to the party a crowd of more than a hundred. And those who came were not disappointed.

Credit for the success of the entertainment is shahred by the hosts with the members of the two girls' societies, who were called in as Consulting Engineers.

CONTINUED FROM PAGE ONE

when such acts, in his or her judgment, will have an injurious effect upon the University.

(3) That the list of advisors be made up by the Committee on Student Activities.

(4) That student organizations be given the right to request a new advisor whenever they feel it would be to the best interests of the organization to do so.

(5) That the Committee on Student Activities have the right to secure the resignation of any advisor when in the opinion of the committee such resignation shall be to the best interest of the organization concerned.

(6) That the student organizations be given the right to appeal to the Committee on Student Activities in cases of the veto of acts by the advisors.

(7) That the committee on student activities be given authority to audit from time to time the accounts and books of all recognized student organizations.

All students who have not already handed in to the office their registration cards should do so immediately.

In case the office is closed, cards may be placed in the mail box at the left of the bulletin board.

TOLEDO UNIVERSITY ALUMNI MEET

The Alumni of Toledo University elected a Board of Directors at a meeting held Thursday evening, October 21, at the Commerce Club.

Mrs. Harry Hibbard, Lit, 1913, for a period of two years; Dr. Francis J. W. Cook, Medical, 1904, for a period of 1 year; Mr. Frederick Zink, Law, 1915, for a period of 1 year. These, with Mr. Watkin H. Starr, Law, 1915, President; Mr. Clarence Conold, Pharmacist, 1915, Vice-President; Miss Eloise Voorheis, Lit, 1913, Secretary, and Mr. Vernon Smith, Law, 1915, Treasurer, make up the Board of Directors.

The Constitution and By-Laws were adopted and the following is of interest:

Article II

Section 2. The active membership in this association shall consist of alumni, that is, persons holding titles, diplomas or degrees given in course by the Toledo University.

Section 3. Students having to their credit the equivalent of one-half the semester hours required for title, diploma or degree, while not in attendance at the University, shall be entitled to Associate membership in this association.

Section 4. Active and associate membership in this association may be obtained by registration with the secretary of the association and the payment of the initiation fee and dues.

Section 7. Associate members shall enjoy all privileges of the association except voting for and holding office of Director.

Article VII—Dues.

Section 1. Each active and associate member shall pay to the Secretary of the Association an initiation fee of three dollars within a month after having been notified of his or her election, said initiation fee to cover all dues for the first year; and thereafter shall pay to the Secretary in advance an annual due determined by the Board of Directors not to exceed two dollars per annum.

Any person desiring any further information please get in touch with the Secretary, Miss Eloise Vorheis, 408 Rockingham Street, Toledo.

The next social meeting of the Association is the luncheon at the Commerce Club, Saturday, November 6.

Attention of students and faculty is called to the Record-Herald box in the lower hall of the main building. News items, local jokes or suggestion for increasing the interest and value of this paper will be appreciated.

TOLEDO SECTION OF ELECTRICAL ENGINEERS MEET AT TOLEDO U.

The meeting of the Toledo section of the American Institute of Electrical Engineers was held in the University building last Wednesday night, Chairman Kirk said, for the purpose of enabling the Electrical students to come in personal contact with practical electrical men.

Four reels of motion pictures provided entertainment. A short speech was made by M. J. Riggs. He gave a vivid word picture of the Panama Canal Zone, which was later shown on the screen. He said that the Panama canal would not have been possible but for electricity.

I. J. Kennedy of New York, who was referred to by Chairman Kirk as the "Father of Electrical Prosperity Week," Nov. 29 to Dec. 4, delivered a short talk in which he said that Idaho and the other states along the coast were a hundred years ahead of New York in so far as the adoption of practical electrical devices were concerned.

Professor A. R. Cullimore, dean of the Industrial Department, in a short speech expressed himself as well pleased with the large attendance and invited all present to examine the electrical and mechanical equipment of the University when the meeting adjourned.

DEAN CULLIMORE'S NEW BOOK

In reviewing Dean A. R. Cullimore's recent book on the Slide Rule, Prof. O. W. Irwin says:

Dean Allan R. Cullimore's recent book on "The Use of the Slide Rule" is in many ways very remarkable. Its scope is broader than that of any book on a similar subject that has yet appeared, and it has the unique merit of not following even remotely the outline of William Cox's epoch-making work in this field. The author has exhibited within the past five years an unusual combination of theoretical and practical fertility, and the present volume is the outgrowth of the author's work of teaching the use of the slide rule to engineering and industrial students. The purpose of the book is to develop the ideas of the operator rather than to give empirical rules.

Dean Cullimore's practical experience following his theoretical course at the Massachusetts Institute of Technology has made him eminently qualified to write a book upon such a useful, yet difficult thing to master, as the slide rule.

Dr. Cohn is offering a course in Bacteriology to dentists. There were nineteen present at the initial meeting of the class held in the Science Building last Thursday night.

NEW ANNEX

Ground has been broken for the erection of a two-story addition to the University. The annex is to be of brick construction, 60 to 70 feet, and will be ready for occupancy at the beginning of the next semester.

When completed the annex will have a fireproof auditorium capable of seating 500 people. Eight class rooms will be on the first floor. The Machine Shop will extend its quarters into the basement of the annex.

SERIES OF LECTURES TO BE GIVEN

A series of lectures are to be given at Toledo University by several of the Professors on successive Sunday evenings in Room 4, at seven o'clock. The following is a list of the professors and their subjects for November.

October 31—Dr. A. M. Stowe spoke on "Our Municipal University As an Agency for Social Progress."

November 7—Dean A. R. Cullimore, "Health As Determined by Water Supply and Waste Disposal."

November 14—Dr. R. N. Whiteford, "The Tempest."

November 21—Prof. O. W. Irvin, "Mammoth Cave."

November 28—Dr. J. S. Pyle, "Biology and Preventable Diseases."

These lectures are under the management of Prof. A. G. Starr.

———o—o———

PROF. LEISERSON SPEAKS ON THE UNEMPLOYMENT PROBLEM

That a laborer should capitalize himself just as an industry does, was the contention of Prof. Leiserson in a speech before social workers on October 12.

Dr. Leiserson's talk was an analysis of the unemployment situation, its causes and extent, closing with a discussion of remedies. Since there is a reserve of labor and society cannot employ all its workers all the time, and the most logical remedy, he said, would be government ownership of all industries with an equal distribution of labor, giving all an annual vacation with pay. But as this plan is not at present feasible, other means must be used. Among the plans discussed were better organized exchanges, run by the state; vocational guidance, by which industries can be kept from overcrowding; the conservation of necessary government work for the "lean years"; and lastly, unemployment insurance.

A. W. STUART'S THESIS IN THE AMERICAN SCHOOLMASTER

The masters' thesis presented by A. W. Stuart, instructor in Waite High School, for the M. A. degree granted him by Toledo University, last June, was printed in full in the September number of the American Schoolmaster, under the caption "The School of Tomorrow." The author's idea of the school of the future is shown in his concluding words. where after describing a school system including night school and neighborhood social school, he says "the school of the future will prepare for a lifetime of such activity."

PROFESSORS OF UNIVERSITY SPEAK TO CITY POLICE

To enable the members of the city police department to derive benefit from the municipal university of Toledo, 36 lectures are scheduled to be delivered to the "officers" by professors of the University. The lectures, which are gratuitous, take place in the police court room every Friday afternoon.

A variety of subjects will be touched. They range from the problems of science and government to the technical discussion of criminology. The courses were outlined by Chief Herbert, Attorney George Seney and Dr. A. Monroe Stowe, president of the University, who were appointed by Mayor Keller.

The first lecture was delivered by S. M. Pimienta, professor of romance languages in the University. He discussed the Mexican situation and Mexico's police.

Professor E. E. Troxell, dean of the College of Commerce and Business, delivered the second lecture. It was the first of the three lectures which he is to give on Business Writing.

Attorney George E. Seney delivered the third lecture on Constitutional Laws.

———o—o———

DEAN CULLIMORE HONORED

Dean A. R. Cullimore has been requested to represent the Society for the Promotion of Engineering Education at the meeting of the Urban Universities, to be held at Cincinnati, November 14 to 17. The meeting at Cincinnati is to be one of national range, and the dean was chosen, therefore, from the professors of engineering in the city universities of the United States.

WHAT? A REAL TEAM

The initial meeting of the aspiring candidates to the varsity basketball team was held last Wednesday. The presence of several fast and experienced players added impetus to the work started by Faculty Manager Henry. Indications are that the University will soon have a "real" basketball team.

The material for a good team this season is promising. Arthur Graves, who was elected captain, will undoubtedly be able to hold down the forward position with Wilfred Christensen tossing 'em in from the other side of the floor. Graves is an old Central high school player, and was last year a member of the First Baptist team of the Church league. Christensen, who is student manager, is a former Scott high player. The more promising candidates for the guard position are Cornell, a man who comes from the Rugby School for Boys, and Kramer, a member of last year's squad at Northwestern University and a former Central High player. Keller, a youngster who made the supporting scribes of Chicago comment on his speed, is another likely candidate.

The fact that there will be keen competition for the places on the team assures us of the best playing of each individual.

———o—o———

MEMBERS OF T. U. FACULTY SPEAKERS AT NORTHWESTERN OHIO TEACHERS' ASSOCIATION

Several of the members of the faculty of Toledo University spoke at the Northwestern Ohio Teachers' Association, held at Scott High School, October 29 and 30.

On Friday afternoon Miss Josephine Leach of the Department meetings discussed "Essentials in Language and the Strongest Motive in Third Grade Language Work." Prof. A. Monroe Stowe, "Thoughts on Social Education." Prof. Robert C. Kissling, "Vortrag-Deutsche Ideale." Prof. A. W. Trettein, "Some Pedagogical Aspects of the Teaching of Natural Science and Some Neglected Factors in the Training of Girls." Prof. Wm. W. Leiserson, "What Industrial Preparation Practical Men Require for Boys They Employ." Prof. A. R. Cullimore, "The Function of Manual Training in an Engineering Education." Dr. Wm. McK. Reed, "The Adulteration of Foods."
